Needlebed Washing Machine

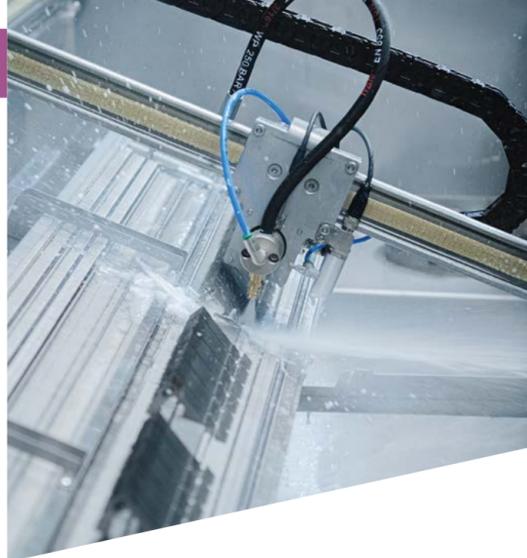

You knit, we take care!

H₂G 4.0

When you ask for the best, **H₂G** answers. Challenge is bread and butter for **H₂G 4.0** that makes the impossible possible.

H₂G 4.0: this is the machine for those who look for the greatest flexibility and best **control** on the **possibility** of washing: you will be able to name and save up to 100 cleaning recipes, and to create a specific program for every kind of model/gauge.

Our **H₂G 4.0** offers **washing programs realized in cooperation with SHIMA SEIKI MFG. LTD**, creating ad hoc solutions for **WholeGarment® MACH2 X/XS** and gloves **MINI SWG** machines.

H₂G 3.0

H₂G 3.0: the machine your knitwear factory can't do without!

The **accuracy of the angle of the nozzle** is electronically controlled by the software to ensure the best washing results in total safety.

Intuitive icons in a 7" full touch screen let you choose among **light, medium or heavy** washing, but **H₂G 3.0** will be the one who recognizes the kind of needlebed to be washed, adapting the process of washing with the best settings.

300 cm combined with the intuitive software allow the cleaning even of the longest needlebeds, or two compact needlebeds at once.

One hour is the average time for a washing.

H₂G Junior

Ideal for those companies with little space and a limited number of machines, **H₂G JUNIOR** offers flawless cleanliness for **all needlebeds up to 168 cm**.

Space-saving dimensions and high efficiency make **H₂G JUNIOR** the must-have ally even for the smallest industrial companies.

MAKE THE MOST!

Keep the needlebeds clean will increase **productivity** and **efficiency** of your machines.

It is so simple and easy, that you'll always be able to have your knitting machine clean as new.
